### DETAILED ACTION

1. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

#### ***Claim Rejections - 35 USC § 112***

2. Claims 26-49 are rejected under 35 U.S.C. 112, second paragraph, as failing to set forth the subject matter which applicant(s) regard as their invention. Evidence that the claims fail to correspond in scope with that which applicant(s) regard as the invention can be found in the specification (page 2, the last paragraph to page 3, 2<sup>nd</sup> paragraph) as originally filed, where applicants state that the composition of matter can be produced by contacting an organometal compound, a solid Lewis acid compound (solid mixed oxide) and an organoaluminum compound, and this statement indicates that the invention is different from what is defined in the claims because the instant claims do not require the presence of both of the organometal compound and the organoaluminum compound in the composition.

Applicants argue that the scope of claims 26 and 46 is found on page 9, line 7-18. Applicants seem misinterpreted the ground of rejection. It is the examiner position that the "composition of matter" (which applicants regard as the invention) is a contact product of three components: (i) at least one solid mixed oxide compound, (ii) at least one organometal compound, and (iii) at least one organoaluminum compound.

However, the instant claims do not require the "composition of matter" to be the contact product of all three components. For example, the "composition of matter" also reads the contact product of (i) and (ii) only, or (i) and (iii) only, and those contact products are

Art Unit: 1713

not regarded as invention by applicants in view of applicants' disclosure, especially in the cited section of page 9, line 7-18 which clearly requires the "composition of matter" to be the contact product of "all three compound".

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

4. Claims 39 and 41 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The application as originally filed does not anticipate that the composition of matter of claim 26 is catalytically active in the presence of borate compounds, alumoxanes, organochromium compounds or  $MgCl_2$ . Those are new matters.

### ***Double Patenting***

5. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Art Unit: 1713

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

6. Claims 26-37 and 39-50 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 6, 7, 18-21, and 23 of U.S. Patent No. US 6,165,929. Although the conflicting claims are not identical, they are not patentably distinct from each other because the subject matters of both sets of claims are substantially overlapping with each other.

***Response to Arguments***

7. Applicant's arguments with respect to claims 26-37 and 39-49 have been considered but are moot in view of the new ground(s) of rejection.

8. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
